PAYMENT FEATURES

- Can you use sandbox credit card details such as:
4111 1111 1111 1111
- Devs may have left sandbox activated?
- <http://support.worldpay.com/support/kb/bg/testandgolive/tgl5103.html>
- https://www.paypalobjects.com/en_GB/vhelp/paypalmanager_help/credit_card_numbers.htm

PAYMENT FEATURES

- What features become available after paying?
- Can I access them without paying?
- Is Payment info visible in the DOM? (inspect with Dev tools)
- Can I leak it through an XSS?

PAYMENT FEATURES

- What payment options are available in different countries?
- Is there any phone or email verification required to initiate payment?
- Can you CSRF shipping address?
- Can you Clickjack Place order?

PAYMENT FEATURES

- It is preferable to choose PayPal or CoinPayments as a payment method
- Intercept all requests, you may find a parameter called Success or Referrer or Callback
- If the value inside the parameter has a URL like this `example.com/payment/MD5HASH` for example
- Copy it, and open it on a new window, you will find that your payment was successful

Thank You!
